10. Discussion of results

11. Conclusion and justification of study

Pilot Study

Before analysis of drug sample on UPLC planning to perform QbD studies (Quality by design)

Limitations of the Study

The limitation of bioanalytical method development and validation was complex procedure for extraction of drug matrix form Plasma, method development and validation.

Significance of the Study

"These bioanalytical validations play a significant role in evaluation and interpretation of bioavailability, bioequivalence, pharmacokinetic, and toxicokinetic studies. In which different parameters like accuracy, precision, selectivity, sensitivity, reproducibility, and stability are performed"[16].
